Diigolet

Diigolet is not as feature-rich as the Diigo toolbar, but it can be set-up by simple drag-and-drop - no download or installation needed, and it works for all major browsers. Much more powerful than bookmarklets offered by other social bookmarking sites, Diigolet is a "super bookmarklet" that allows you to highlight and add sticky-notes, in addition to simple bookmarking.

You can get started by watching a [tutorial video](#).

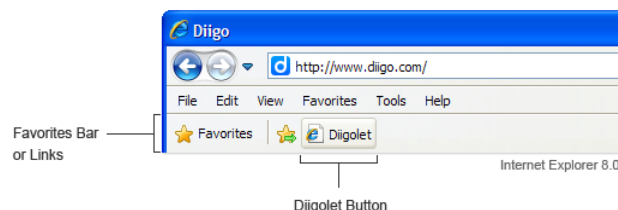

Internet Explorer

1. Make sure your "Favorites Bar" is visible. If it is not, right click on any part of the menu bar and make sure "Favorites Bar" is checked.
2. Right click this button: [Diigolet](#) and click "Add to Favorites..."
3. Click "Yes", if pop up "Security Alert" dialog.
4. Be sure to save the favorite in your "Favorites Bar" folder so that it appears in your Favorites Bar.
